### **CHRONOLOGY OF BIOFUND**

### INTRODUCTION

BIOFUND is a Mozambican private foundation, set up in 2011 with the mission of contributing to the sustainable financing of biodiversity.

The main focus of BIOFUND is on the country's Conservation Areas (ACs).

BIOFUND made its first disbursement in 2016. Two years later, it has seen its investment capital increase significantly, and as a result it has also increased the number of beneficiary Conservation Areas.

The outstanding aspect in this period is that BIOFUND has taken on greater responsibilities in new programmes, such as, for example, MozBio 2, financed by the World Bank. This great initiative covers: i) additional support for the operational costs of the ACs, ii) implementation of the Mozambique Program for Conservation Leadership (PLCM), iii) the development of conditions for the establishment in the country of a "biodiversity offset" policy, and also, iv) looking into other innovative financial mechanisms (such as payment for ecosystem services).

In 2018, BIOFUND supported 9 Conservation Areas.

# RESULTS

- 2018 WAS A YEAR OF GROWTH FOR BIOFUND.

- PROGRESS WAS MADE IN ALL THE AREAS WHERE THE FOUNDATION INTERVENES.

### **BIOFUND IN NUMBERS** 2014 - 2018

### **STRATEGIC VISION** – THE THREE PILLARS

CONSOLIDATE BIOFUND

FINANCE CONSERVATION

CREATE A FAVOURABLE ENVIRONMENT

One of the fundamental activities undertaken in 2018 was the revision and updating of the Strategic Plan of the Foundation for the period 2018-2022.

Keeping in essence the three strategic pillars, it extended the scope of intervention of the organisation and included actions involving work with the communities.

The focus is "guarantee the conservation of biodiversity through the integration, training, financing and strengthening of partnerships between the different sectors of society".

#### **Mission:**

Sustainable financing of the conservation of biodiversity, with a particular focus on the national system of conservation areas as a contribution to the balanced development of the country.

#### Vision:

To be the preferential mechanism for financing the conservation of biodiversity in Mozambique.

#### Values:

- Professionalism
- Efficiency
- Transparency
- Inclusion

#### CONSOLIDATE BIOFUND

### **FUND RAISING**

Endowment 32.5 2018 24.7 2017 21.2 2016 14.4 2015 10.6 2014

**Endowment:** an increase of almost 35%, rising from 24.7 million to 32.5 million US dollars, in 2018.

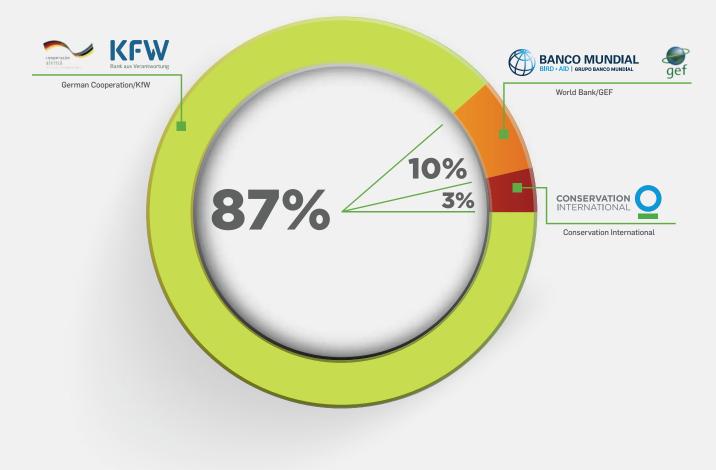

**Sinking funds:** in 2018, USD 4.2 million were raised, representing a growth of 40% on the USD 3.0 million attained in 2017

**Innovative financing:** BIOFUND continued in 2018 to develop the biodiversity offsets programme with the support of USAID/ Counterpart International and the regional and international networks of CAFÉ and RedLAC.

BIOFUND is beginning to become known as an effective mechanism for channelling financial support. In 2018, the European Union chose BIOFUND as the vehicle of its support for biodiversity in the country, thus joining AFD (Abelha Project) and the World Bank (MozBio I and II).

With these projects, it is calculated that over the next 6 years the Foundation will distribute about 20 million US dollars, in addition to the regular disbursements from the income from its endowment.

### **CONTRIBUTIONS TO THE ENDOWMENT**

#### ≋MUE>D≪<br/>

The growth of the endowment was mainly due to grants from the German government via KfW. However, during this year the volatility of the capital markets resulted in a reduction in the gains from the investments made.

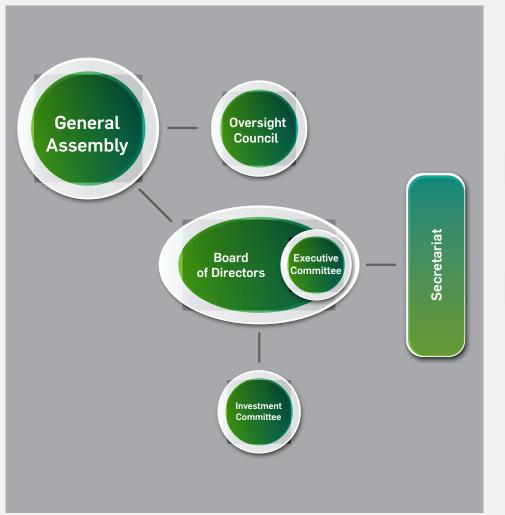

#### ≊MU≥D33D0∭≋D

### CONSOLIDATE BIOFUND INSTITUTIONAL GROWTH

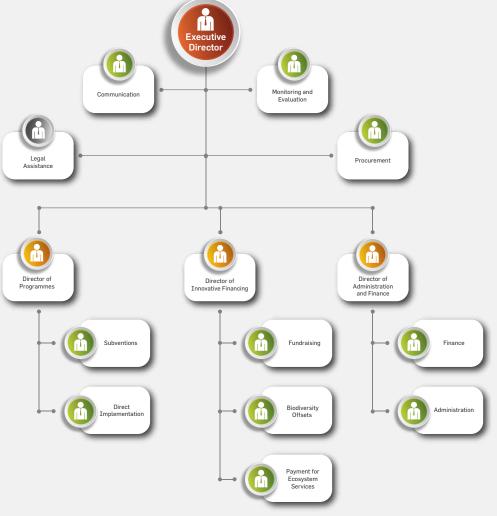

A major contribution to the improved performance of the BIOFUND's team in 2018 was the revision of the organisational structure and operational instruments of the institution undertaken over the last two years, with the support of the technical assistance provided by a consortium headed by GITEC and including FUNBIO – the Biodiversity Fund of Brazil. This support, which was financed by German Cooperation through KFW, made it possible to revise the operational and procedures manual and to map the BIOFUND processes.

As a result, BIOFUND has expanded its staff, leading it to divide its Programme area into two sectors (the Programme Directorate, focused on disbursements for the ACs, and a new Directorate of Innovative Financing). Also added to the BIOFUND organisational chart were the Communication, Monitoring and Evaluation and Procurement units.

### **CONSERVATION AREAS THAT BENEFITTED FROM BIOFUND IN 2018**

### FINANCIAL PERFORMANCE OF THE BENEFICIARIES

The execution of the 2018 budget, in all areas that receive direct funding from BIOFUND (World Bank – Mozbio Project and AFD – Abelha Project), is in excess of 90%.

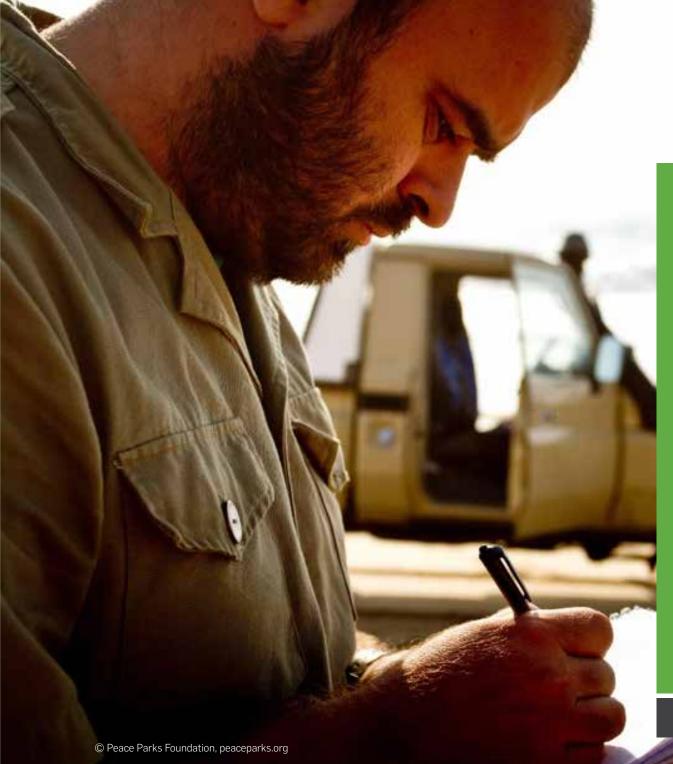

### MAIN ACTIVITIES FINANCED

- Improved performance of the ACs, particularly in terrestrial, coastal and marine patrolling (leading to a reduction in poaching and other illegal activities);
- Maintenance of infrastructures and equipment;
- Communications;
- Road maintenance;
- Monitoring of species (whith emphasis on sea turtles and removal of invasive species);
- Community awareness.

#### What is the importance of BIOFUND support for the Ponta de Ouro Partial Marine Reserve and the Maputo Special Reserve?

The great contribution of BIOFUND support is to the operational costs and the basic needs of the Maputo Special Reserve, such as, for example, vehicle maintenance, fuel and ration, among others. This support is very relevant since without it we would face limitations in carrying out our daily tasks. Without BIOFUND support, it would be difficult to maintain the growth curve of investment that Ponta do Ouro has been showing.

The investment by BIOFUND, together with other partners, allows the maintenance of some vital programmes such as the monitoring of turtles and coral reefs, allowing us to gather information about the state of the resources for more appropriate management and reducing significantly negative aspects such as the mortality rate of important species.

With the basic conditions guaranteed, other partners may support in relevant areas such as infrastructures, monitoring and re-introducion of species, thus contributing to tourism and improving the living conditions of local communities.

Miguel Gonçalves - Manager of Ponta do Ouro Partial Marine Reserve and Maputo Special Reserve

### **MONITORING AND EVALUATION**

#### In 2018 a monitoring and evaluation unit was set up in BIOFUND.

The policy and the monitoring manuals that accompanied the creation of this unit allowed the Foundation to follow not only its own technical performance, but to start looking at the impact of its action on the Conservation Areas, identifying indicators that provide a consistent and verifiable level of information about the core business of BIOFUND.

These indicators are divided into three levels of monitoring:

PHYSICAL-FINANCIAL MONITORING	PERFORMANCE MONITORING	IMPACT LEVEL MONITORING
<b>FF-1.</b> % budgetary execution by project	P-1. Number of patrols	I-1. Annual Deforestation rates (Global Forest Watch)
FF-2. % of monthly accounts submitted on time	<b>P-2.</b> Number of existing (and number of operational) boats and vehicles	I-2. UNDP/GEF Financial Sustainability Scorecard for Mozambique
FF-3. % of accounts submitted without errors	<b>P-3.</b> Km travelled compared to fuel spent	I-3. % of key indicator species with stable or increasing populations
<b>FF-4.</b> number of beneficiaries who are confronted with Step 4 of the Dealing with Failure procedure	<b>P-4.</b> Value of operating costs/ km2 (with and without BIOFUND's support)	I-4. State Financing Levels of the CAs
<b>FF-5.</b> Administrative and Financial Capacity of the CAs	P-5. % of non-salary operating costs covered by BIOFUND	
	P-6. METT Scores

Promoting the consolidation of an enabling environment for conservation in Mozambique	Number of users of BIOFUND website	-	-	4,110	6,052	12,531	8,000

### **BIODIVERSITY EXHIBITION**

The third and final pillar of the BIOFUND strategic approach is aimed at creating a favourable environment for conservation. For this, one of the fundamental elements has been the itinerant exhibition on biodiversity which has been held since 2015. In 2018, this activity took place in Inhambane, with the title "The Culture of Conservation and Sustainable Development". The exhibition was extensively covered by the media, such as radio, television and the newspapers, during a period of three months.

#### CREATE A FAVOURABLE ENVIRONMENT

### ADVOCACY ON BIODIVERSITY OFFSETS

BIOFUND in partnership with WCS/Project COMBO has supported the Mozambican government in establishing the legal, technical and financial procedures for implementing the hierarchy of mitigation and biodiversity offsets in Mozambique.

Various advocacy training actions have been held, involving representatives of the public sector, private sector, civil society, the academic world and society in general about the best practices of environmental impact evaluation and application of the concept of the hierarchy of mitigation. The programme is supported by USAID/Counterpart International and by UNDP.

One aspect that stood out in 2018 was the photographic exhibition on biodiversity offsets held during the VI General Assembly of BIOFUND.

#### CREATE A FAVOURABLE ENVIRONMENT

### NATIONAL INNOVATIVE FINANCING

Created in 2017, the BIO debit card was the first partnership with a local bank - BCI - and had a remarkable expansion in 2018.

# THEME OF THE YEAR: MANGROVES

"... the mangrove forests are among the most climate-resilience, productive and biodiverse ecosystems on Earth..."

Global Mangrove Alliance

In Mozambique mangroves support the livelihoods of more than 60% of the population who live in coastal areas. These mangrove forests are strongly impacted by urban development, illegal extraction of wood and extreme climate events.

Annual Report 2018 BIOFUND 31

#### **ACTIVITIES HELD IN 2018**

- Inputs for establishing a legal framework on mangroves in Mozambique;
- Research on the potential of the mangrove forests as receivers of biodiversity offset projects;
- Promotion of events to raise awareness of the ecological and socioeconomic relevance of the mangroves.

# **IN INCUBATION**

- 2018 WAS A YEAR OF MANY ACHIEVEMENTS, BUT IT WAS ALSO A YEAR OF PREPARATION FOR MUCH THAT WILL FOLLOW.

- IN THIS SECTION, WE STRESS 3 NEW INITIATIVES THAT WILL BE IMPLEMENTED AS FROM 2019.

#### IN INCUBATION

### **MOZAMBIQUE PROGRAM FOR CONSERVATION LEADERSHIP (PLCM)**

- Support from the World Bank.
- Opportunity to strengthen the capacity of the human resources of the conservation areas through: training and internships; interchanges; and making use of the potential of staff recently trained in national universities and institutes.

IN INCUBATION

### PROJECT "PROMOVE Biodiversity" - EU

• New partnership with the European Union.

• 10.2 million euros for 6 years.

• 3 main areas, namely: support the management of conservation, promote research, and strengthen community activities.

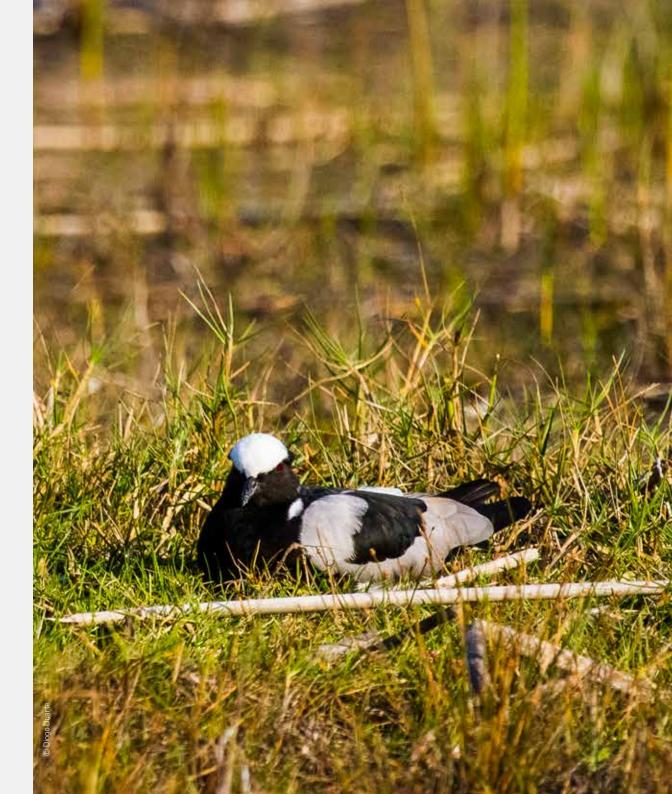

• Gilé NR, Mount Mabu and Primeiras e Segundas Environmental Protection Area (APAIPS).

• APAIPS is particularly important for BIOFUND, since 2015, its endowment includes a grant from Conservation International of 1 million USD, yields from which are destined exclusively for that conservation area.

#### IN INCUBATION

### **MOZBIO 2**

- MozBio 2 is supported by the world Bank.
- Channelling of operational support of about 4.5 million dollars.
- 3 landscapes: Maputo Special Reserve/ • Ponta do Ouro Partial Marine Reserve, the Chimanimani National Reserve and the Marromeu National Reserve.
- Implementation of the PLCM. .
- Expansion of the biodiversity offsets programme.
- Institutional support, including a significant contribution to the BIOFUND Endowment, with GEF funds.

# **FINANCIAL REPORT 2018**

### 

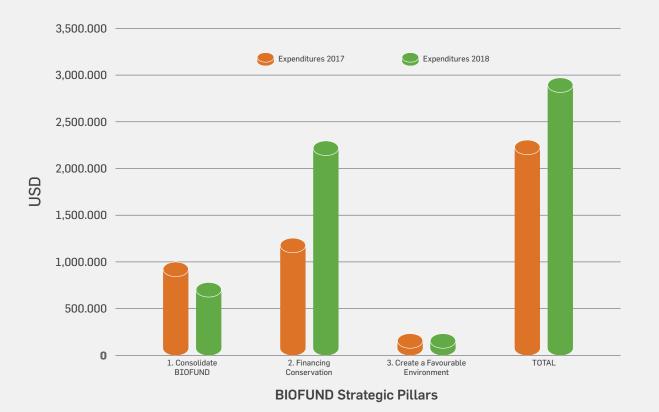

FINANCIAL REPORT 2018

### **FINANCIAL EXECUTION 2017-2018** BY STRATEGIC PILLARS

• In the overall financial execution, BIOFUND had an increase of approximately 32%.

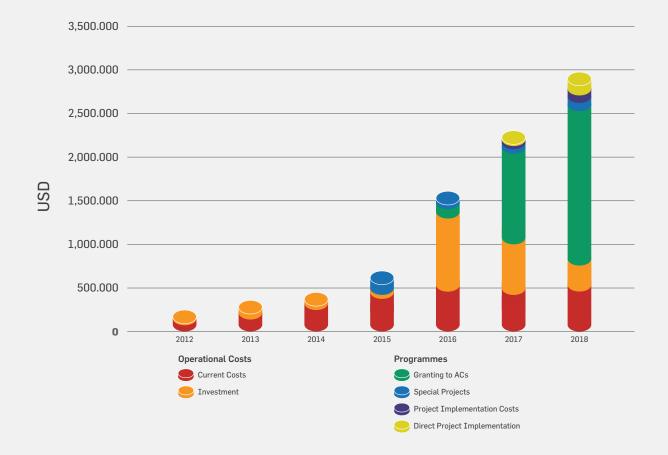

• The greatest contribution to this level of execution came from the disbursements for the Conservation Areas which grew by 64% in comparison with 2017.

FINANCIAL REPORT 2018

### FINANCIAL EXECUTION BY NATURE OF EXPENDITURE

• In 2018 the volume of programme implementation almost doubled compared to the previous year.

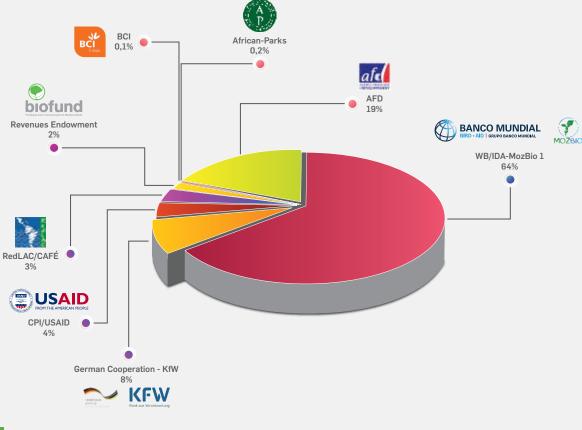

#### FINANCIAL REPORT 2018

### FINANCING SOURCES FOR 2018

- World Bank MozBio 1 Project financing 64% of the global budget, from which more than two-thirds (2/3) were channeled to Conservation Areas.
- AFD contributing with 19% almost exclusively to Abelha Project.
- Technical Assistance Project from KfW representing about 8% of the implementation in 2018.

### **EVOLUTION OF FINANCIAL** EXECUTION 2012 – 2018
